The principle is easy. A player sets a target multiplier (e.g., 2.00 x, 10.00 x, or perhaps 1000.00 x). The game's algorithm then generates a random multiplier. If the created multiplier is **equivalent to or higher** than the player's target, the bet wins. If it fails, the bet is lost.

2. **Select a Target Multiplier:** The player inputs their preferred winning multiplier. This can vary anywhere from a modest 1.01 x up to extreme values like 1,000,000 x, depending on the gambling establishment's maximum payment limits.
3. **Inspect the Win Chance:** As the gamer changes the target multiplier, the game interface instantly determines the analytical likelihood of winning (Win Chance %) based on your house edge.
4. **Hit "Bet" or "Play":** The round executes immediately. A random number is produced in milliseconds, displaying the result on the screen.

Understanding the Mechanics: House Edge and Probability

Behind Limbo's simple user interface lies accurate mathematics. The game relies greatly on likelihoods, and comprehending these numbers is vital for any gamer seeking to handle their bankroll effectively.

In most versions of Limbo, the **home edge** varieties in between **1% and 2%**. This indicates that over the long term, the gambling establishment maintains a small percentage of all wagers.

The relationship between the target multiplier and the win chance is inversely proportional. As the target multiplier increases, the win chance reduces substantially.

Example Limbo Multiplier vs. Win Chance Table (Based on a 1% House Edge)

Target Multiplier Statistical Win Chance Prospective Payout on £ 10 Bet **1.05 x** 94.28% £ 10.50 **2.00 x** 49.50% £ 20.00 **5.00 x** 19.80% £ 50.00 **10.00 x** 9.90% £ 100.00 **50.00 x** 1.98% £ 500.00 **100.00 x** 0.99% £ 1,000.00 **1,000.00 x** 0.099% £ 10,000.00

As highlighted in the table, setting a target of 2.00 x offers the gamer approximately a 50% opportunity of doubling their cash (minus your home edge), while chasing a 1,000.00 x multiplier drops the chances to less than one in a thousand.
