2. **Introduce the Aircraft:** Once the round begins, the airplane takes off, rising vertically or diagonally throughout the screen.
3. **Collect Multipliers:** As the plane climbs up, it comes across numerous multipliers, stars, and fuel products drifting in the airspace. Going through these items increases the total payout for the round.
4. **Handle Fuel:** The plane runs on a finite fuel supply. Every second in the air consumes fuel, and gamers should collect fuel refills to keep the flight going.
5. **The Conclusion:** The round ends when the airplane either lacks fuel and descends, or effectively finishes its flight course. The objective is to cash out or accumulate the highest possible multiplier before the flight ends.
