2. Fuel Management and Obstacles

Unlike endless vertical scrollers where movement is infinite, Avia Masters presents realistic or semi-realistic constraints. Airplane are bound by fuel capacity, and numerous in-flight modifiers-- such as tailwinds, headwinds, and altitude markers-- can alter the trajectory and effectiveness of the flight.

3. The Cash-Out Dynamic

The specifying feature of the experience is the exit method. Participants need to manually collect their development before the flight terminates. If the flight ends too soon due to an in-game hazard before a collection is made, the session results in an absolutely no return.

Game Phase Description Individual Action **Pre-Flight** Setting up specifications and seeing previous flight information. Adjust settings and get ready for launch. **Ascent** The aircraft removes; multipliers start to increase. Monitor the flight path and multiplier growth. **Travelling/ Mid-Game** Weather condition events or speed increases may occur. Evaluate threat vs. benefit in real-time. **Termination/ Cash-Out** The flight concludes either by option or danger. Carry out the collection command before catastrophe strikes.

  - *Concept:* Allowing the flight to continue into higher multiplier brackets, accepting that lots of runs will result in a total loss for the sake of catching an enormous multiplier.
