This comprehensive guide explores how Ghost Immobilisers work, why expert installation is non-negotiable, and how to pick the right fitter for your automobile.

What is a Ghost Immobiliser?

Established by Autowatch, the Ghost Immobiliser is the world's first aftermarket CAN-bus immobiliser. Unlike standard alarm systems or immobilisers that depend on different key fobs or loud sirens, the Ghost is completely concealed within the vehicle's circuitry harness.

It works by obstructing the signals on the automobile's Controller Area Network (CAN-bus). When a motorist attempts to begin their car, the engine will not crank or begin unless a distinct, secret PIN code-- ranging from 4 to 20 presses-- is gotten in using existing buttons in the car (such as steering wheel controls, door panels, or the center console).

Key Features of a Ghost Immobiliser:

- **Undetectable by Thieves:** Because there are no additional crucial fobs, LEDs, or radio frequency signals, diagnostic devices can not discover the system.
- **No Wire Cutting:** The gadget interacts straight with the automobile's data network without the need to cut standard automobile loom wires.
- **Service/Valet Mode:** Allows the vehicle to be serviced or parked by a valet without jeopardizing the secret PIN code.
- **Weatherproof:** Small and long lasting enough to be concealed deep within the automobile's internal architecture.
