What is Online Limbo?

Limbo is an instant-win gambling establishment game popularized by crypto gambling establishments. Inspired by the traditional limbo dance-- where players try to go as low as possible-- the online casino variation flips the principle: **how high can you go?**

Unlike traditional games where gamers spin reels or wait on cards to be dealt, Limbo is defined by its simpleness. A gamer sets a target multiplier (e.g., 2x, 10x, or perhaps 1,000,000 x) and puts a bet. The game then generates a random multiplier result. If the generated outcome amounts to or higher than the gamer's target multiplier, the bet wins. If it falls below, the bet is lost.

Secret Characteristics of Limbo
