Some players increase their base bet after a streak of non-Double outcomes (psychology-based "hot-hand" approach).Statistically unimportant in isolation, but can partially improve ROI when combined with a vibrant bet-sizing algorithm. **Bankroll Segmentation**Divide the total bankroll into 3 "pockets": (i) Regular play, (ii) Bonus-focused, (iii) High-variance "all-in" for Crazy Time only.Enables disciplined threat management, avoiding a single unfortunate streak from erasing the entire bankroll. **Timing the Host's "Big-Spin" Cue**The host occasionally signals a "big spin" (e.g., by saying "Alright, let's get crazy!") which historically corresponds with a slightly higher occurrence of benefit hits (≈ 0.5% increase).Exploiting this pattern can improve hit possibility, though it is not guaranteed and should be used moderately.
