

While often associated with fixing existing problems, basement waterproofing is also relevant for new construction, and JLB Foundation Repair and Basement Waterproofing consults on these projects in Gladstone. Incorporating proper waterproofing during initial construction can prevent many of the issues that develop in existing homes over years of exposure to Missouri's clay soil and moisture. JLB's team can advise builders and homeowners on [basement waterproofing](#) appropriate drainage and waterproofing measures to include from the outset, avoiding costly retrofits down the line.

JLB Foundation Repair and Basement Waterproofing | 111 NE 72nd St Ste 111, Gladstone, MO 64119 | (816) 408-3651

This proactive approach reflects the same engineering focused philosophy JLB applies to its remediation work on existing basement waterproofing issues. For basement waterproofing consultation on new construction in Gladstone MO, contact JLB Foundation Repair and Basement Waterproofing at (816) 408-3651.
