Yes. Since they do not involve real cash, betting, or the transfer of real Steam items, they do not breach Valve's Terms of Service or local gaming laws.

2. Can I transfer skins from a simulator to my Steam stock?

No. All products won inside a simulator are entirely virtual and exist just within that specific site or app's environment. They have no connection to Steam.

3. Are the drop rates in simulators accurate?

Reliable simulators set their algorithms to match Valve's formally estimated drop rates (approximately 0.26% for a knife). However, code can differ depending upon the platform, so results should be seen as approximations.

4. Do I need to log in with my Steam account to utilize a simulator?

A lot of basic web-based simulators require **no login** at all. Be very mindful of any website requesting for your Steam login credentials, as it may be a phishing rip-off attempting to take your actual CS2 stock.
