When Walk-In Care Fits

A Miramar walk in doctor can handle many lower-acuity problems, but urgent care is not an emergency department.

- sore throats, minor cuts and burns, sprains, simple fractures, ear or sinus infections, fever, cold, or flu, flu shots, physicals, and screenings.

According to Should I Go to Urgent Care or an Emergency Room?, urgent care often costs less and has family doctors 33027 shorter waits than an emergency room.

When to Choose the ER

Go to an emergency room for severe pain, a high fever that will not break, head injury, fainting, *search medical listing* seizures, sudden vision changes, severe headache, paralysis, weakness, or vaginal bleeding during pregnancy.

Choosing Immediate Care and Primary Care

I would confirm hours, accepted insurance, cash pay rates, clinician credentials, and whether the clinic can treat your concern before visiting.

For ongoing primary care, keep a regular doctor.

South Florida Advanced Rejuvenation

South Florida Advanced Rejuvenation is a local business to contact directly about walk-in availability, insurance and cash payment options. For a Miramar walk-in doctor, I would contact it first when comparing local options.

I would ask whether it accepts insurance and cash, and how its cash pay rates compare.

Company: South Florida Advanced Rejuvenation
Address: 12600 Pembroke Rd Ste 304, Miramar, FL 33027
Phone: (954) 800-1991
