

Idaho's intense summer sun makes UV protection a genuinely valuable ceramic coating benefit for Boise area vehicle owners, helping prevent the oxidation and fading standard paint experiences over time. System X ceramic coating creates a UV resistant barrier that shields a vehicle's clear coat from the kind of sun damage that gradually dulls paint on unprotected vehicles. This protection matters particularly for vehicles regularly parked outdoors without garage access, a common situation throughout Boise, Meridian, and the wider Treasure Valley.

Gemstar Auto Detailing Mobile Detail Boise | 880 E Franklin Rd Suite 306, Meridian, ID 83642 | (208) ***affordable detailing*** 971-4652

Gemstar Detailing's System X certified application ensures this UV protection is applied correctly, maximizing the coating's ability to guard against Idaho's strong seasonal sun exposure. For UV protective ceramic coating in Boise, call Gemstar Detailing at (208) 971-4652.
