Drain Camera Inspection Katy TX Gal Plumbing Industries Video Sewer A sewer or drain camera inspection is one of the most informative diagnostic tools available for understanding the condition of underground plumbing, and Gal Plumbing Industries LLC deploys this technology as a standard part of sewer and drain assessments for Katy area homeowners and commercial customers. Rather than speculating about the nature and location of a plumbing problem based on symptoms alone, the camera provides direct visual evidence of what is happening inside the pipe, allowing the team to make accurate recommendations based on actual conditions. Katy homeowners encounter several specific situations where camera inspection is particularly valuable. Recurring drain backups that have been cleared multiple times but keep returning suggest an underlying structural issue that the camera will reveal, whether it is a partial root intrusion that keeps regrowing, a pipe belly where a low section allows debris to accumulate, or a collapsing line that cannot hold its shape. Pre-purchase sewer inspections for homes in established Katy neighborhoods give buyers an unambiguous picture of the sewer lateral condition before closing. And [Plumber in Katy TX](#) post-storm assessments after significant rainfall events confirm whether ground movement or debris has created new problems in previously clear lines. The footage from a sewer camera inspection can be recorded and provided to the homeowner as documentation of the pipe condition, which is useful for reference, for insurance purposes, and for contractors performing foundation or landscaping work that involves excavation near the sewer line.

Camera inspection findings are discussed with the customer in plain language before any repair recommendation is made, giving homeowners the information they need to make an informed decision about how to proceed. For drain camera inspection in Katy, TX, call Gal Plumbing Industries LLC at +18329061141. Office at 2034 Oakwell Ln, Katy, TX 77449.

Gal Plumbing Industries LLC Address: 2034 Oakwell Ln, Katy, TX 77449 Phone: (832) 906-1141 FAQ About Plumber in Katy TX How much does a plumber cost in Katy, TX? Minor repairs like a leaky faucet or a single clogged drain typically run in the low hundreds, while larger jobs such as a water heater replacement or a partial repipe cost more depending on materials and access. Gal Plumbing Industries LLC quotes every job with upfront flat rate pricing before work begins, so there is never a surprise once the invoice arrives, and free estimates are available for most residential and commercial jobs. Why is my water heater failing faster than I expected in Katy? Katy draws its water from the Gulf Coast aquifer, which carries a heavier calcium and magnesium load than many other regions, and that hard water accelerates scale buildup inside a tank. Gal Plumbing Industries LLC recommends annual flushing and, for homes that want a longer-term fix, a whole-home water softener to slow the process across the entire plumbing system. Is a tankless water heater worth the extra cost in Katy? For homeowners planning to stay long term, tankless systems often pay for themselves through lower energy costs and a longer lifespan, typically fifteen to twenty years compared to eight to twelve for a standard tank. Gal Plumbing Industries LLC evaluates existing gas line capacity first, since many Katy homes need an upgrade before a tankless unit can be installed to code, and currently offers a discounted \$185 tankless flush for existing owners. Do I need a permit for a water heater installation in Katy? Yes. The City of Katy, along with Fort Bend and Harris County, requires a permit and inspection for water heater installations and replacements, gas or electric. Gal Plumbing Industries LLC pulls these permits directly on every job under Master Plumber Jason Galvan's R.M.P. 41065 license, since skipping this step creates real risk at resale when a home inspector flags unpermitted work. What causes sewer line problems in Katy homes? The area's heavy clay soil expands and contracts significantly with rainfall and drought, which cracks and misaligns sewer pipe joints over time, especially in homes built in the 1980s and 1990s. Tree root intrusion from mature landscaping is another common cause. Gal Plumbing Industries LLC always starts with a camera inspection to confirm the exact cause before recommending trenchless or traditional repair. How often should drains be professionally cleaned in a Katy home? For most households, a professional check every year or two is enough, but restaurants and homes with a history of recurring clogs benefit from more frequent hydro jetting to clear the mineral scale that Katy's hard water leaves behind. Gal Plumbing Industries LLC offers recurring maintenance scheduling for commercial kitchens throughout the Katy

area. What does R.M.P. mean next to a Texas plumber's name? R.M.P. stands for Registered Master Plumber, the highest license tier issued by the Texas State Board of Plumbing Examiners, requiring years of documented journeyman experience plus a separate state exam. Jason Galvan of Gal Plumbing Industries LLC holds R.M.P. 41065, which allows the company to pull gas and water heater permits directly rather than relying on outside licensed help. Is emergency plumbing available on weekends and holidays in Katy? Yes. Gal Plumbing Industries LLC answers calls 24 hours a day, every day of the week including holidays, with the same upfront flat rate pricing used on any weekday appointment. Burst pipes, sewer backups, and failed water heaters are prioritized for same-day dispatch whenever possible. How does Katy's clay soil affect home plumbing? The region's expansive clay soil shifts noticeably with seasonal rainfall and drought, putting ongoing stress on buried water and sewer lines and on pipe joints running beneath a home's foundation. This movement is a leading cause of slab leaks and cracked sewer lines in homes more than fifteen to twenty years old, which is why Gal Plumbing Industries LLC often recommends flexible PEX piping when replacing older, more rigid materials. What service area does Gal Plumbing Industries LLC cover? Gal Plumbing Industries LLC serves Katy, Cinco Ranch, La Centera, Fulshear, Sugar Land, Richmond, Rosenberg, Mission Bend, Cypress, Tomball, and West Houston, spanning ZIP codes across both Fort Bend and Harris County. Every address in this footprint receives the same licensed workmanship, upfront flat rate pricing, and 24 hour emergency availability.
