What is a CS: GO Case Battle?

At its core, a case battle is a multiplayer, player-versus-player (PvP) unboxing mechanic hosted on third-party CS: GO betting and trading websites. Rather of opening a case alone in the game client, numerous gamers (normally 2 to four) pool their resources to buy a particular set of cases.

Once the battle begins, the system simultaneously opens the picked cases for all participants over a number of rounds. At the end of the battle, the total monetary worth of all the skins dropped for each gamer is computed.

The player with the greatest cumulative skin value wins all the items dropped in the battle, including their challengers' skins.

- **Potentially Better Return on Investment (ROI):** In basic unboxing, your home constantly wins in the long run. In a case battle, even if a player opens poor skins, they can still win the match just by out-lucking their challenger, winning double or triple their preliminary financial investment.
