In a normal crash game:

1. Players place a wager before a round begins.
2. A thing (typically a rocket, jet, or, in this case, an aircraft) removes.
3. As the item gains altitude, a multiplier value boosts (e.g., 1.00 x, 1.50 x, 2.00 x, and beyond).
4. Players must select the optimum minute to **squander** before the object arbitrarily "crashes" or vanishes.
5. If a gamer squanders effectively, they win their original stake multiplied by the present worth. If the object crashes before they squander, the bet is lost.

Avia Masters takes this precious mechanic and fine-tunes it with immersive visuals, smooth animations, and an user-friendly interface that interest both beginners and veterans.
