If you run a home service business, your website needs to do a simple job. It needs to help people call you, trust you, and send in a lead without any hassle. That is where contractor website design really matters.

Scalable Websites is a veteran-owned website design company based in Montgomery, TX. Founded in January 2025, the company focuses on mobile-first websites for contractors, home service businesses, and local small businesses. The team brings 10+ years of experience and 200+ websites built for home service businesses. For contractors looking for a website designer Montgomery TX businesses can work with in person, that local focus makes a difference.

This is not built around a one-size-fits-all approach. It is built around how contractors actually get work.

Built for how contractors get leads

A contractor website should not just sit there and look nice. It should help turn traffic into calls and form submissions. Every site includes the pieces that matter for that.

Each website includes click-to-call, Google reviews shown on the site, custom lead forms **web design montgomery tx** with instant text and email alerts, on-page SEO from day one, and hosting and security. Those are practical features for busy companies that need to respond fast and make a good first impression.

That is a big part of what makes Scalable Websites different for contractor website design in Texas. The focus is not on fluff. The focus is on helping a website designer montgomery tx roofing company, HVAC company, plumber, remodeler, pool company, septic company, or general contractor get a site that supports real day-to-day business needs.

The company also builds custom web design, custom WordPress websites, and website redesign projects. So if a contractor already has a site that feels outdated or hard to manage, a website redesign can be part of the solution without changing the goal, which is getting more useful leads from the website.

Local service, practical support

A lot of contractors want to work with someone who understands the area and can meet face to face. Scalable Websites is a service-area business, not a walk-in office, and it meets clients in person across Montgomery County and greater Houston. That includes Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

For companies searching for web design Montgomery TX or web design The Woodlands, that matters. Local service means conversations can stay grounded in what a contractor actually needs, not what sounds fancy in a sales pitch.

The company is open Monday to Friday, 8 AM to 5 PM. Owner Preston Toor leads the business, and the company holds a 5.0-star Google rating.

Straightforward plans with ongoing website maintenance

One thing that often separates a useful small business website design company from a frustrating one is what happens after launch. Contractors need changes. They need updates. They need somebody keeping an eye on the site.

Website maintenance is built into the offering. That includes unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For contractors, that can save time and reduce the stress of trying to handle website issues alone.

The plans are clear and easy to compare:

- Starter, $95 a month for a single-page site
- Growth, $195 a month for 3 to 5 pages, plus missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics
- AI Enhanced, $295 a month for 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations

Every plan has a 6-month minimum, then goes month-to-month. The client owns the site after 36 months. There is also a free design refresh every 36 months and a 30-day money-back guarantee on signup.

That setup stands out because it covers both the build and the long-term upkeep. For a contractor, that can be more helpful than getting a site built and then being left on your own.

A fit for contractors and local small businesses

Not every website company is set up for the trades. Scalable Websites works with roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, general contractors, and 30+ more trades.

That focus matters because contractor website design is different from building a site for a restaurant, a clothing store, or a national brand. Contractors need mobile-first design because many customers are searching from a phone. They need click-to-call. They need lead forms that send alerts right away. They need reviews displayed on the site. They need updates handled without wasting time.

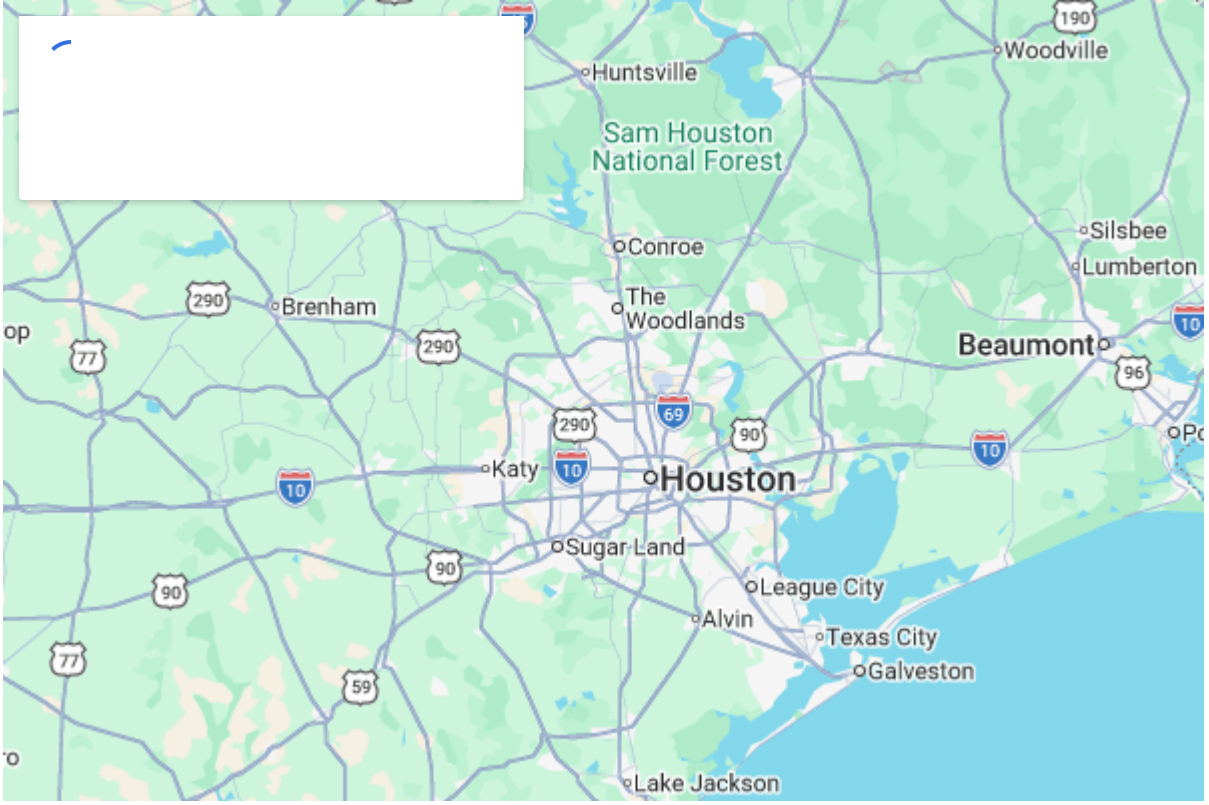

That same practical approach also makes sense for small business website design in local markets across Texas. Whether a company needs a first website, a custom WordPress build, or a website redesign, the core idea stays the same. Keep it easy for customers to reach out, and keep it easy for the business owner to manage.

For contractors comparing options for web design Montgomery TX or nearby areas, the difference often comes down to whether the website company understands how service businesses operate. Here, the offering is shaped around that reality from the start.

Scalable Websites, based in Montgomery, TX. (832) 979-2478.
