Home service companies do not need a flashy website. They need a website that helps people call, request service, and trust the business fast. That matters even more across Greater Houston, where homeowners have a lot of options and often make quick decisions from their phones.

Scalable Websites is a website design company based in Montgomery, TX, built for that kind of work. The company focuses on mobile-first websites for contractors, home service businesses, and local small businesses. That includes custom web design, website redesign, custom WordPress websites, and website maintenance.

For a contractor, the goal is simple. When somebody lands on your site, they should know what you do, see proof that people trust you, and have an easy way to reach you right away.

Built for the way home service customers actually shop

Most people looking for roofing, HVAC, plumbing, fire protection, fencing, pools, septic, landscaping, remodeling, or general contractor work are not sitting at a desk comparing ten companies. They are usually on a phone, trying to solve a problem.

That is why every site is built mobile-first. It is also why every website includes click-to-call, Google reviews shown on the site, custom lead forms with instant text and email alerts, on-page SEO from day one, and hosting and security.

Those features are practical. Click-to-call gives people one clear next step. Reviews help build trust without making visitors hunt for them. Instant alerts help the business respond faster when a lead comes in. On-page SEO from day one helps the website start with a strong foundation.

For businesses looking for contractor website design, that kind of setup matters more than extra bells and whistles. A website should support the way your team actually works day to day.

A fit for contractors and local businesses across Greater Houston

Scalable Websites meets clients in person across Montgomery County and greater Houston. That includes Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

That local service area matters for companies searching for a website designer Montgomery TX businesses can actually talk to face to face. It also matters for owners looking for web design Montgomery TX, web design The Woodlands, or small business website design that reflects how service companies sell in this region.

The company is veteran-owned, founded in January 2025, and led by owner Preston Toor. The team brings 10+ years of experience and 200+ websites built for home service businesses. It also holds a 5.0-star Google rating.

That background gives contractors something useful, experience with the kinds of businesses that depend on calls, quote requests, and steady local visibility.

Simple plans, clear features, and ongoing support

A lot of business owners do not want a complicated website package. They want to know what they are getting and what happens after the site goes live.

Scalable **web design montgomery tx** Websites offers three plans:

- Starter, $95 a month for a single-page site
- Growth, $195 a month for 3 to 5 pages, plus missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics
- AI Enhanced, $295 a month for 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations

Every plan has a 6-month minimum, then goes month-to-month. The client owns the site after 36 months. There is also a free design refresh every 36 months and a 30-day money-back guarantee on signup.

That structure can make sense for home service companies that want a professional website without turning it into a big side project. It also gives growing businesses room to start small and ***web design montgomery tx*** move up when needed.

Website maintenance that keeps the site useful

For many contractors, the hard part is not launching a website. It is keeping it updated and working.

That is where website maintenance becomes important. Scalable Websites includes unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager.

Those are the things owners often do not think about until something breaks, the site goes down, or an old page needs to be changed in a hurry. Ongoing maintenance helps keep the website from becoming stale or unreliable.

A website redesign can also help if the current site no longer reflects the business, does not work well on mobile, or makes it too hard for customers to get in touch. For companies that have outgrown a basic site, a redesign can be less about looks and more about making the website easier to use and easier to manage.

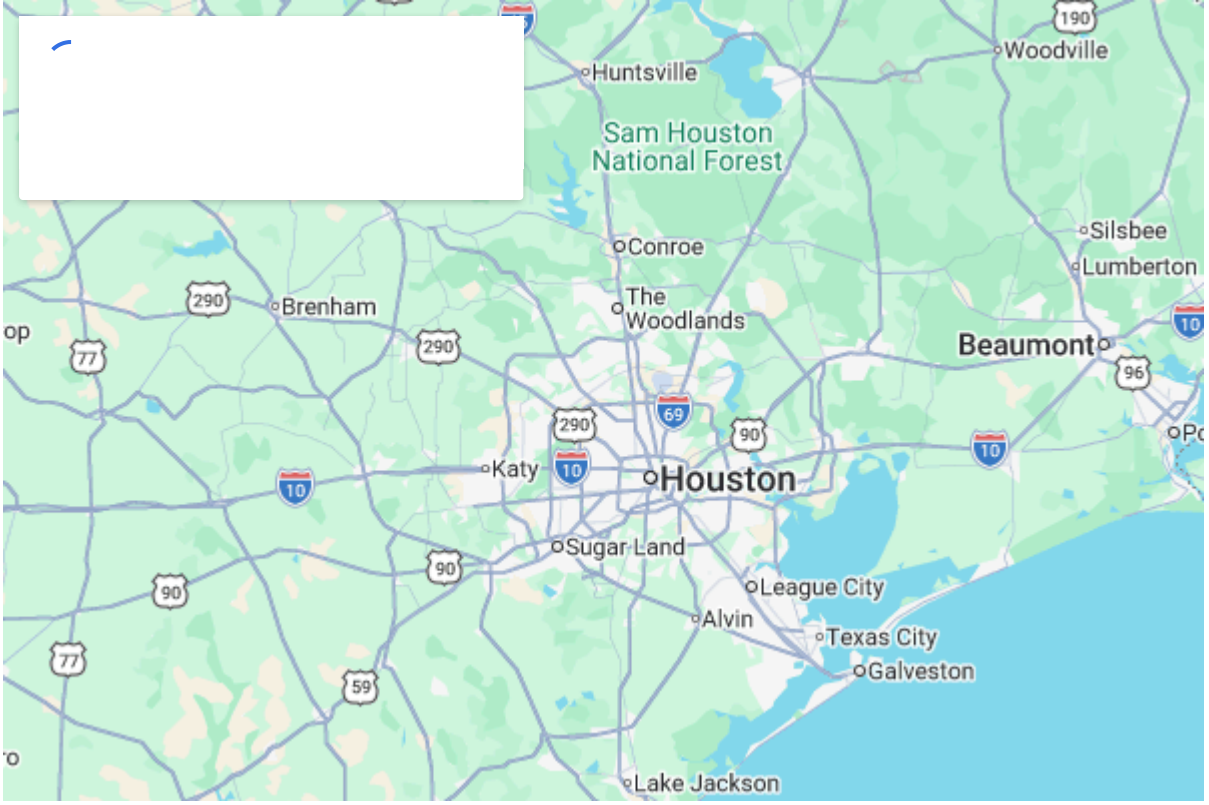

For home service brands across Greater Houston, standing out usually comes down to clear communication, trust, and responsiveness. A website should support all three. It should look professional, work well on a phone, and make it easy for a customer to call or send a lead.

That is the role Scalable Websites is built to fill for contractors and small businesses across the region.

Scalable Websites, based in Montgomery, TX. (832) 979-2478.
