The premise is uncomplicated:

1. **The Grid:** The game is generally provided as a vertical grid, typically featuring configurations like 3x9, 4x9, or comparable measurements (rows and columns).
2. **The Ascent:** The player starts at the bottom row. Each row includes a set variety of tiles (e.g., three tiles in a 3-column game).
3. **The Goal:** The player needs to choose one tile per row, moving up step-by-step.
4. **The Catch:** Hidden behind certain tiles are barriers (typically illustrated as skulls, bombs, or traps), while safe tiles expose multipliers, gems, or stars.
5. **The Payout:** Hitting a safe tile increases the overall multiplier. Players can "cash out" at any time before hitting a trap. If they hit a trap, the round ends, and all built up earnings for that round are lost.
