

Malaysia Schools Release 2027 Calendar with Details on Holidays for Students 2027

The Ministry of Education in Malaysia has published the official school calendar for 2027, providing a full breakdown of term dates, school breaks, and public holidays across all states. The schedule, which applies to all government and government-aided schools, groups states into two main clusters based on the start of the academic year. This release serves as the primary reference for parents, educators, and the media regarding holidays for students 2027.

Calendar Structure and State Groupings

For the 2027 academic year, schools in Malaysia are divided into Group A and Group B. Group A comprises Johor, Kedah, Kelantan, Perlis, and Terengganu. These states begin the school year in early January. Group B includes the remaining states and the federal territories of Kuala Lumpur, Labuan, and Putrajaya. Their school year starts in mid-January. This grouping affects the exact dates of mid-term breaks, final examinations, and end-of-year holidays. The calendar is designed to align with major festive periods and public holidays observed at the national and state levels.

Key Term Dates

The school year for 2027 is divided into three terms for most states. The first term begins in January and runs through March, followed by a one-week break. The second term starts in April and continues until June, with a two-week mid-year break in June and July. The third term begins in July and ends in November or early December, depending on the state grouping. For Group A states, the final term concludes earlier to accommodate the year-end holidays. Group B states have a slightly later finish. The Ministry has confirmed that the total number of school days for the year remains consistent with previous years, at approximately 190 days per academic session.

Public Holidays and School Closures

The calendar incorporates all gazetted public holidays in Malaysia, including Chinese New Year, Hari Raya Aidilfitri, Deepavali, Christmas, and national days such as Merdeka Day and Malaysia Day. Each state also observes its own public holidays, which are reflected in the school closure dates. For example, schools in Kedah, Kelantan, and Terengganu are closed on the second day of Chinese New Year and on Hari Raya Haji, while schools in other states may remain open. The Ministry advises parents and schools to check the specific calendar for their state to avoid confusion.

The extended breaks, such as the mid-year holidays and the year-end holidays, are periods when most schools are closed for two to four weeks. These breaks are intended to allow students and teachers a rest period and to coincide with major festive seasons. For 2027, the mid-year break falls in June and July, while the year-end break begins in November for Group A states and in December for Group B states. The exact dates are provided in the official schedule published by the Ministry of Education.

Significance for Students and Families

Understanding the [holidays for students 2027](#) is important for families planning travel, tuition schedules, or other activities. The calendar helps parents avoid booking holidays during school terms and ensures students do not miss critical examination periods. The Ministry of Education has stated that the calendar is designed to minimise disruption to learning while allowing for sufficient rest. For students sitting for major national examinations, such as the Sijil Pelajaran Malaysia (SPM) and Sijil Tinggi Persekolahan Malaysia (STPM), the examination periods are scheduled within the term dates, typically in the second half of the year. The Ministry has also included buffer weeks for revision before the examinations begin.

Comparison with Previous Years

The 2027 calendar follows the same pattern as recent years, with minor adjustments to the start and end dates of terms to align with the lunar calendar. The dates for Hari Raya Aidilfitri and Deepavali shift annually, which affects the timing of school breaks. For 2027, Hari Raya Aidilfitri is expected to fall in late April or early May, while Deepavali is expected in late October. The Ministry has taken these dates into account to ensure that major festivals fall within the school holidays whenever possible. This approach aims to reduce the number of additional school closures and to allow families to celebrate together.

State-Specific Variations

While the overall structure is uniform, there are state-specific variations in the 2027 calendar. For instance, states in Group A have a shorter first term and a longer third term compared to Group B states. This is due to the earlier start of the academic year in Group A. Additionally, some states observe a separate holiday for the Sultan's birthday or other local events, which may result in an extra day off for schools in those states. The Ministry of Education provides a separate calendar for each state, which can be accessed through official education department websites. Schools are required to follow the calendar for their respective state grouping.

Preparation for the New Academic Year

Schools are expected to communicate the term dates and holidays to parents well in advance. The Ministry has issued guidelines for schools to distribute the calendar at the beginning of the academic year. For 2027, schools are also encouraged to post the calendar on their notice boards and websites. Parents are advised to mark the holidays for students 2027 on their personal calendars to plan family activities. The Ministry has also reminded schools that any changes to the published calendar will be announced through official channels and that parents should rely only on the official schedule.

Impact on Educational Planning

The release of the 2027 school calendar allows educational institutions, tuition centres, and other service providers to plan their programmes. Many tuition centres coordinate their schedules with the school holidays to offer intensive revision classes or holiday camps. The Ministry has noted that the calendar is designed to provide a balanced academic year with adequate breaks for students to recharge. The holidays for students 2027 are also a factor in the planning of co-curricular activities, sports events, and school trips. Teachers use the calendar to plan their lesson plans and assessments.

Official Resources

The Ministry of Education has published the 2027 school calendar on its official portal. The document includes a list of all public holidays, school terms, and examination periods. It also provides a breakdown of the number of school days per term. For media inquiries, the Ministry has directed reporters to the official website for the most accurate and up-to-date information. The calendar is available in both Malay and English versions to ensure accessibility for all Malaysians.

About the 2027 School Calendar Guide

This information is part of a guide to the 2027 school calendar in Malaysia, including holidays, term dates, and state groupings by the Ministry of Education. The guide serves as a reference for parents, teachers, and the public to understand the structure of the academic year and to plan accordingly.
